Hoppt Pavement Compactor

PCPT90P

Pavement Plate Compactor

The Hoppt Pavement Plate Compactor features a unique rubber roll bar system that allows for excellent compaction of pavers and bricks while minimising cracking and chipping that can occur when using a traditional cover to a standard iron plate compactor. Also allows for much better manoeuvrability saving time and money.

Features and Benefits

- Design for compaction of bricks and pavers to the ground
- Perfect for landscaping and car park works. Rubber-bars are used in place of iron plates to prevent damage.
- Low operating noise levels
- Belt guard ensures the safe operation of the pulley system, making it safer for both user and machine
- Individually mounted rubber-bars makes it cheaper for replacement, lowering maintenance cost

Specifications	PCPT90P
Dimension - LxWxH (mm)	1,064x669x1,091
Operating Weight (kg)	123
Plate size - DxW (mm)	655x620
Vibration Frequency (Hz)	94
Centrifugal Force (KN)	10.3
Engine	Honda GX160 @ 3.6kW – 4 stroke Petrol
