Hoppt Power Screed

HCS50

Power Concrete Screed

The HCS50 is a quick and versatile concrete screed for use for floor finishing and adjusting operations. The design of the HCS50 allows for even and uniform distribution of concrete over the entire blade length thus allowing for better concrete compaction.

Features and Benefits

- Durable Honda GX35 engine
- One piece aluminium design for easy clean up
- Light weight of 14kg for easy transportation and handling
- Easy access handlebar with throttle control and vibration reduction handle
- Quick disconnect system to allow for easy attachment and rotation of Screed beams

Screed Beams

- Easy-Care blade design
- No tools required for attachment to Power Screed

Available in lengths - 1.8m, 2.4m
