

Product Description

Fatrafol 807v is a PVP-P based waterproof roofing membrane with underlay of a non-woven PES-textile (mass per unit area - 120g/m²). It is resistant to UV radiation and can be exposed to the direct weathering influences. Fatrafol 807 has one edge of the sheet without non-woven textile due to enable a longitudinal band joining.

Usage

Fatrafol 807v is identified for adhesion systems. The membrane can be adhered directly onto a construction of a roofing mantle, which fulfils requirements for flatness (Fibre-cement, vibrates concrete, etc), possibly onto a suitable waterproof layer beginning treated by heat. The expansion polyurethane adhesives which are especially identified for cementing can be applied.

The membrane is unsuitable for adhesion onto bitumen surfaces and for mechanical anchoring.

It is necessary to apply a homogenous sheet Fatrafol 804 due to detail working.

Application

The laying of Fatrafol 807v can be made by specialised and for this purpose trained firms at the constructions. The membrane is applied under conformity with fundamentals being set and described in a Construction and Technologic Instruction of the producer, being valid in the time of waterproofing.

The membrane must be adhered to a stable part of the substrate/coating by sticking (polyurethane adhesives).

The membrane is mutually jointed by welding of hot air. The laying and jointing can be carried out in temperatures up to -5 degrees celsius.

Product Data

Fatrafol 807v fulfils requirements of the standard EN 13956

Thickness [mm] (EN 1849-2)	Width [mm] (EN 1848-2)	Length [m] (EN 1848-2)	Quantity [m ²]
<u>effective:</u> 1.20 (- 0.06; + 0.12) <u>total:</u> 1.60 *)	<u>total:</u> 2050 (- 10; + 20) <u>free edge:</u> 70 (± 10)	19 (- 0; + 0.95)	38.95

Dimensions:

*) Informative value

Packing, transport & storage: Fatrafol 807 is packed into the rolls, which are laid on the wood pallets and fixed by a packing film. FATRAFOL 807 must be transported in covered transporting means and stored in original closed packing. The recommended storage temperature is from -5 °C to +30 °C. There is necessary to protect the product from pollution at the building site. There is recommended to protect it from weathering influences till the processing time.

Technical Parameters

*) The samples meet also at the pressure of 60 kPa

Safety Instruction

Scrap disposal: Fatrafol 807 must be disposed conformable with valid legal regulations. The clear scrap can be recycled, scrap not suitable for recycling you can depony. Waste, polluted by dangerous substances, is necessary to dispose by burning in the incinerator of dangerous wastes.

Safety at work and health protection

There is necessary to keep all safety, hygienic and fire regulations valid in the time of laying and membrane joining.
